Multi-compatible suction filter element for HFSE filters

This new filter element is specially designed for highest versatility for OEM as well as distribution purpose. The new system can be used on the new asa suction filter generation HFSE (HFSE000074I00) as well as on many well-known filter systems in the market. This filter includes the spring, which is required to fulfill the replacement with the given cross reference items. Contact us with support@asa-innovation.com for further information on our filter range, or see our other solutions at www.asa-innovation.com.

Spare part filter element for

- HFSE000074
- HFSE000074B01
- HFSE000074B02

Cross reference

- Argo Hytos P2.0923-01
- MP Filtri SF2250AG4HP10P01

Technical Data

order number	HFEP000074I00
weight	0,44kg
material top and end cap	aluminium
material center tube	zinc coated steel with blue passivation
filter media	resin impregnated paper 10µm
filtration efficiency	β 20 > 2 in accordance to ISO 16889
filtration flow	through the filter from inside to outside
working temperature	-30°C up to +110°C
compatibility with fluids	mineral oils
max. pressure drop	1 bar
pressure drop	0,03bar @ 45l/min in accordance to ISO 3968
